## **Definitions**

### **Investigatory Detention**

An “investigatory detention” is a temporary deprivation of a person’s liberty for investigative purposes based upon reasonable suspicion that the person has committed, is committing, or is about to commit a crime or infraction. The following items are investigative detentions which require data collection:

- all investigatory motor vehicle stops
- all stop-and-frisks of a person based on reasonable suspicion
- all other investigatory or temporary detentions of a person during any investigative stop

*In the absence of a codified definition, an investigative detention is generally defined as a temporary seizure of a person for the purpose of determining, (1) whether there is probable cause to arrest the person, (2) whether further investigation is warranted, or (3) whether the officer’s suspicions were unfounded. However, the underlying law is established and provided in United States v. Cortez, 449 U.S. 411 (1981) where the court held that a detention for investigative purposes is based on “reasonable suspicion of criminal activity” and the officer must have “a particularized and objective basis for suspecting the particular person stopped of criminal activity.” Thus, the standard is clear that an investigative stop must be based on reasonable and articulable suspicion of criminal activity. That suspicion must be confirmed, in which case an arrest may be made based on probable cause, or dispelled and the person is released.*

*If a stop is not investigative in nature nor focused on suspicion of criminal activity, then it is not an investigatory detention for the purposes of determining whether to collect information under the Code. Each of the categories designated for the collection of data is merely a modification of an investigatory detention (i.e. an investigatory motor vehicle stop is an investigatory detention). Each of the categories demands the same standard of reasonable suspicion of criminal activity to be met, except as provided below. If a law enforcement function is based on civil enforcement authority or previously established probable cause, such as an eviction or the arrest of a person based on a warrant (during a police function which is not an investigatory stop or detention), then it does not meet the collection standard.*

*Where persons are temporarily detained by operation of law in the furtherance of an investigative matter rather than based on the particularized suspicion of criminal activity, data collection is required. This includes where law enforcement officers search a premises pursuant to a search warrant and detain the occupants for the purposes of officer safety or to prevent the destruction of evidence. See Michigan v. Summers, 452 U.S. 692 (1981). It also includes the affirmative detention of a passenger, such as ordering and detaining an occupant from the vehicle, during a routine traffic stop for safety reasons, even if the officer has no reason to suspect the passenger of criminal behavior. See Pennsylvania v. Mimms, 434 U.S. 106 (1977). Lastly, it may also include the temporary detention of a driver or pedestrian, excluding fleeting stops which do not further a law enforcement purpose, pursuant to a non-discretionary stop plan, such as in the case of a traffic or perimeter checkpoint. See, e.g., Michigan Dep’t of State Police v. Sitz, 496 U.S. 444 (1990).*

Q: Are there any restrictions on the type of stop data reported by a law enforcement agency?

A: Virginia State Police will accept all data submitted that complies with the Instructions and Technical Specifications; where placement in any given category can be reasonably explained. While Virginia State Police does attempt to provide guidance on data collection, it is ultimately up to each agency to determine which scenarios meet the undefined criteria of the Community Policing Act.

Q: Is data reporting required for pedestrian stops?

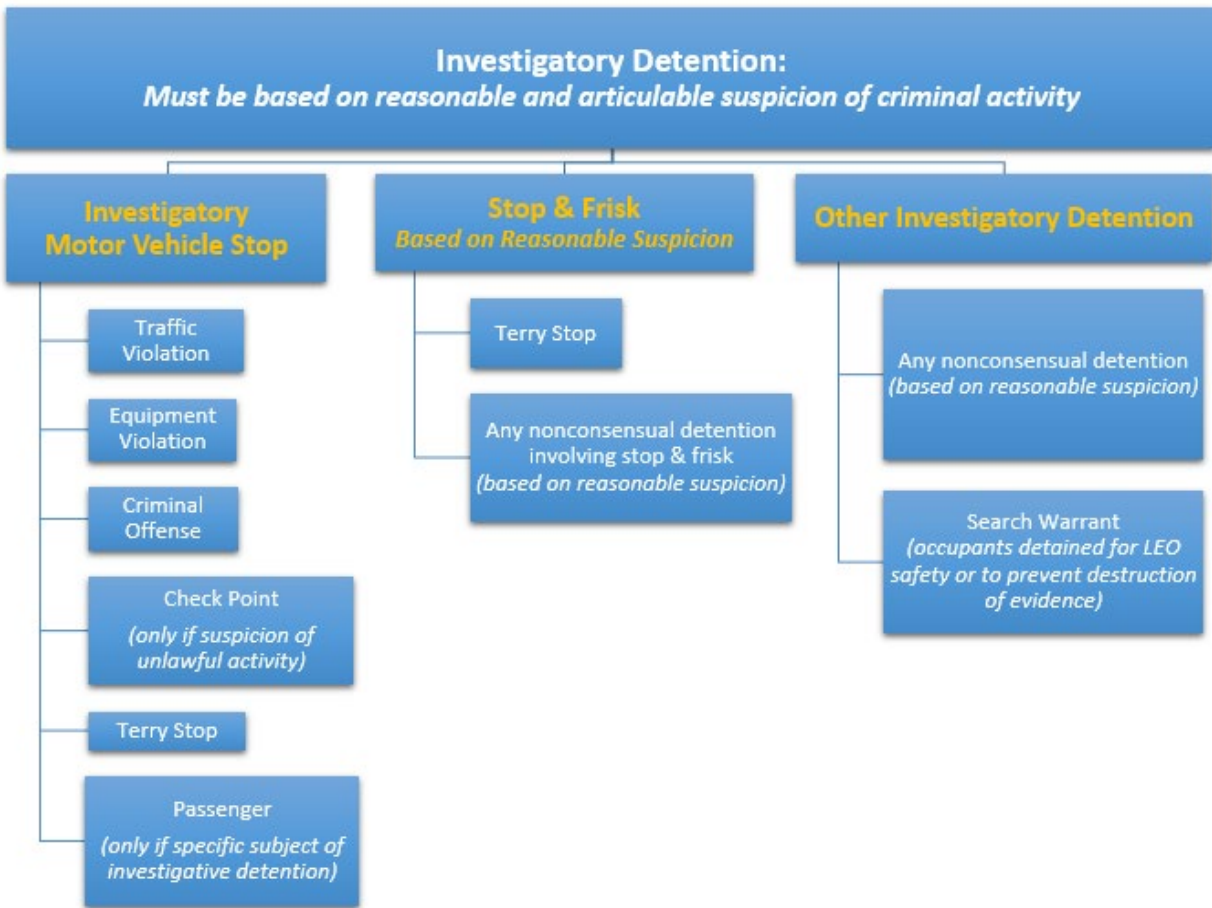

A: Yes. Based on the expanded definition of stops to be collected by Senate Bill 5030, pedestrian stops are required as of July 1, 2021. Each person subject to an investigatory detention is a separate entry in the Community Policing data collection.

Q: Do we collect passenger information during a motor vehicle stop?

A: Passenger information is collected as a separate stop if the passenger is part of an investigatory detention. Each person subject to a nonconsensual stop is a separate entry in the Community Policing data collection.

Q: Are motor vehicle accidents considered "motor vehicle stops" for purposes of the Community Policing Act's data collection?

A: In most instances the parties have already stopped and are voluntarily waiting for an officer to investigate the incident. Therefore, collection of community policing data on traffic accidents is not required. However, it is ultimately up to each agency to determine which scenarios meet the undefined criteria of the Community Policing Act. The department will accept traffic accident data from those agencies that choose to report it under any of the following reasons for stop: "traffic violation", "calls for service", or "other".

The following instances will most likely not require data collection, unless they meet the elements of the CPA listed above:

Service of Civil Papers, Court Orders or Process	Non-Criminal	Wellness Checks
<ul style="list-style-type: none"> <li>•Evictions</li> <li>•Levies</li> <li>•Subpoenas</li> <li>•Taking someone into custody at sentencing</li> <li>•Orders of Protection - EPO, PPO, PO</li> <li>•Detention/Custody Orders - TDO, ECO</li> </ul>	<ul style="list-style-type: none"> <li>•Runaway</li> <li>•Suicide Attempt</li> </ul>	<ul style="list-style-type: none"> <li>•Homeless Person</li> <li>•Medical Assistance</li> <li>•Mental Health Assistance</li> </ul>

*Note: These are merely examples and they do not represent an all-inclusive list. Some situations may have different elements. Therefore, each situation will need to be evaluated to determine if it meets the requirements of the data collection.*

### **File Extraction**

Collected data elements should be submitted at least quarterly on or by the 15<sup>th</sup> of the following month. Agencies are permitted to submit a monthly file, but not any more frequently than each month. (Ex: Data from July 1, 2021 to September 30, 2021 is due by October 15<sup>th</sup>, 2021)

There are two methods of collection:

1. Manual data extraction from CAD/RMS in **csv format**  
OR
2. Manual update of an Excel spreadsheet provided by Virginia Department of State Police
  - a. **Save file as 'csv' prior to sending**

Save as type: CSV (Comma delimited) (\*.csv)
